Art Unit: 1756

1. The examiner contacted the applicant on August 22, 2005 to obtain a terminal disclaimer and cancellation of the claims corresponding to the count and which were the subject of an adverse decision, but the applicant's representative declined to do so at that time.

2. The applicant has received an adverse judgement with respect to claims 27 and 28 in the ruling by the Board of Patent Appeals and Interferences dated 08/2004 and is directed to cancel these claims. These claims are rejected under Res Judicata.

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-4 and 7-21 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-20 of copending Application No. 10/430593 (US 20040003638).

Application No. 10/430593 (US 20040003638) recites in claim 1, the formation of a shim bearing a holographic pattern, the transferring of the pattern to a die, the hardening of the die surface, the provision of a metal tubular article and embossing of the pattern from the die to the tubular metal article. Claim 2 recites the hardening is the provision of a surface coating of diamond like carbon, amorphous diamond or carbon nitride. The embossed articles recited include aluminum tubing. Claim 8 recites the provision of a photoresist coated substrate, which

Art Unit: 1756

is patterned, a shim grown on this, the shim used to transfer the pattern to a die, where the die is provided with a diamond-like coating. Claim 10 sets the resist pattern depth as 2-3 microns.

Claim 15 recites providing a hardened print cylinder having a holographic image on a portion of its surface and a hard temper aluminum tubular article towards each other, contacting the two and rotating to transfer the images.

While the claims are not identical each and every limitation of the claims of the instant application is recited in the claims of the co-pending application and broader claims clearly embrace the embodiments of the instant claims.

This is a provisional obviousness-type double patenting rejection.

4. Claims 22-25 are allowable.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Martin J. Angebrannt whose telephone number is 571-272-1378. The examiner can normally be reached on Monday-Thursday and alternate Fridays.
